What You Actually Offer

For founders whose work is too complex for the pitch deck.

A WORKBOOK FOR CLARIFYING OFFERINGS, NOT INVENTING THEM

01 The condition

The business exists. Clients arrive, the work is good, people return. But when someone asks what you do, the answer comes out long, or apologetic, or slightly different every time.

That is rarely a sign you are unclear. More often the work has grown past its first explanation, and the explanation never got updated. Offers piled up. Some you love. Some you keep selling out of habit.

This workbook starts with what already exists. Nothing new needs inventing before you can see what you have.

02 How to use this sample

List every offer you currently sell on the next page, including the ones you would quietly like to retire. Answer the last column quickly. Your first answer is usually the honest one.

03 The offer audit

OFFER	WHO IT'S FOR	WHAT CHANGES FOR THEM	KEEP?

In the last column, write **yes**, **less** or **no**.

04 The sentence test

Write what you do in one sentence a stranger could repeat to someone else. Write it three times. Keep the version you would actually say out loud.

THE FULL WORKBOOK

This is a two-page sample of *What You Actually Offer*, a 20-page workbook. The full version also holds:

— Separating what you sell from what you want to sell
— Naming and ordering tiers so clients can choose
— Language that describes complex work without flattening it
