The Waiting

Living well in the time before the change.

A GUIDE FOR THE PERIOD BEFORE A KNOWN CHANGE

01 The condition

You know what is coming. A move, a result, a start date, an ending. You are not there yet. The waiting is its own place, and nobody hands you a map for it.

People tend to get lost here in one of two ways. Some move into the future entirely and begin packing a life they are still living in. Others refuse to prepare at all, as if not looking at the date might keep it from arriving.

Neither is a failing. Both are ways of managing a suspension that has no natural shape. This guide gives it one: a little attention to what is ending, a little to what is coming, and a boundary around both.

02 How to use this sample

Choose one day a week and give the next page ten minutes. Update both columns, answer the question at the bottom, and close it. The rest of the week belongs to the life you are in.

03 Still here / Getting ready

On the left, what you want to keep doing, finish or enjoy before the change. On the right, what has to be prepared, and by when.

STILL HERE	GETTING READY

What would I regret not doing in the life I'm still in?

If the waiting is for medical results or another outcome you can't influence, the right-hand column may stay short. That is accurate, not a gap.

THE FULL GUIDE

This is a two-page sample of *The Waiting*, a 16-page guide. The full version also holds:

— Living with impatience without letting it run the week
— Preparing for what's next without disappearing from now
— Telling people, and choosing when
